HANDCRAFTED FOR DOGSPORTS
SINCE 1872

Herm. Sprenger

HANDCRAFTED FOR DOGSPORTS
SINCE 1872

■ Product marking

All Sprenger collars are stamped on the rings. The HS-GER-MANY, which is completed by INOX or CUROGAN depending on the material, guarantees quality „Made in Germany".

You will also find our marking on the Ultra plates and swivels, unmistakably identifying a SPRENGER product.

■ Guaranteed breaking loads

Careful material selection, electronic monitoring of the welding process and verification of the tensile strength are just as much a part of the work process as constant documentation of the results.

For each material and wire thickness there are individual, pre-programmed parameters to achieve the desired strength. This enables SPRENGER to provide guaranteed breaking loads for all collars.

■ „HANDCRAFTED FOR DOGSPORTS"

... is not just an advertising slogan for SPRENGER, but reflects the quality philosophy that is lived by the family and the staff. This is our way of always meeting the quality demands of the modern dog owner and professional dog training.

We manufacture our premium products using a variety of crafts as well as classical and modern machines. A manual inspection and the packaging of the finished product complete our value chain.

In contrary to mass production, our manufactured goods still pass through many hands.

Our quality thinking is not only aimed at the value of the products, delivery and customer service are also of great importance to us.

We are available as a reliable supplier and business partner so that we can count you among our loyal customers on a long-term basis.

About SPRENGER

In 1872 Hermann Sprenger founded a factory for riding accessories. In the course of the years his successors added the manufacture of boat fittings and dog accessories.

Decades of experience in manufacturing, an extensive market knowledge and the collaboration with professionals from the fields of dog training, medicine and research constitute the basis for the development of international standards.

DISCOVER SPRENGER 2.0

STAINLESS
STEEL MATT

The modern quality stainless steel matt represents an innovation from SPRENGER. It combines all the proven advantages and positive features of a SPRENGER dog collars made of stainless steel. A special manufacturing process gives the collars and fittings the matt design.

Since it is not a coating, color changes due to natural abrasion cannot be excluded. Due to the properties of stainless steel, the material darkens evenly over time.

SPRENGER collars made of matt stainless steel have all the positive features you know and appreciate from our polished stainless steel collars.

- QUALITY, ROBUSTNESS AND DURABILITY
- HIGH BREAKING LOADS
- APPEALING NOBLE OPTICS
- FULL MATERIAL
- STAINLESS
- SEAWATER RESISTANT
- USE A MILD DETERGENT OR RINSING AGENT FOR CLEANING

STAINLESS
STEEL BLACK

TRADITION MEETS MODERN LOOK
High-quality dog collars made of blackened stainless steel

All collars in the standard range made of stainless steel form the basis for this quality. During a galvanic process, the surface is blackened and finally polished.

Since it is not a hard coating, the permanent friction of the fur on the metal can create an attractive antique look. We recommend our standard range of stainless steel with polished surface or CUROGAN for dogs with a tendency to discolour fur.

Look out for our metal tag with the red dot and the HS-GERMANY INOX stamp on all rings and swivels when buying a black stainless steel product.

- SOLID MATERIAL - SURFACE BLACKENED & POLISHED
- ABSOLUTELY STAINLESS
- SEAWATER RESISTANT
- HIGH STRENGTHS
- USE A MILD DETERGENT OR DISH SOAP FOR CLEANING

STAINLESS
STEEL

QUALITY WITH TRADITION
High quality dog collars made of stainless steel

The numerous advantages of this quality are the reason why especially dog sportsmen and professional trainers use stainless steel collars.

Special processing steps in production and the selection of materials create properties such as seawater resistance, robustness and safety.

When buying a stainless steel product, pay attention to our metal tag with the red dot and to the HS-GERMANY INOX stamp on all rings and swivels, which guarantees you the described premium SPRENGER-quality.

- **SOLID MATERIAL - POLISHED**
- **ABSOLUTELY STAINLESS**
- **SEAWATER RESISTANT**
- **CARE WITH OUR DIAMOND PASTE (METAL POLISH)**

CUROGAN

THE NICKEL-FREE ALTERNATIVE
High quality dog collars made of CUROGAN

This quality was developed for dogs that react to other materials with a discoloured fur. CUROGAN is an excellent alternative for over 90% of these dogs.

In addition to their anti-allergic properties (nickel-free), CUROGAN collars are very popular because of their appealing appearance. The high copper content gives the collar a brilliant color that darkens in use. With the help of our Diamond Paste, the original condition can be restored at any time.

Due to the high copper content, these chains have a higher material abrasion inside. Therefore we recommend to check the collars visually on a regular basis and to replace them in time.

- SPECIAL COPPER ALLOY WITH HIGH STRENGTH
- SOLID MATERIAL - POLISHED
- NICKEL-FREE
- STAINLESS
- MAINTENANCE WITH OUR DIAMOND PASTE (METAL POLISH)

HANDCRAFTED FOR DOGSPORTS
SINCE 1872

STEEL

HIGH GLOSS OPTICS COMBINED WITH A ROBUST SURFACE
High quality dog collars made of chrome-plated steel

Chrome-plated collars manufactured by SPRENGER are characterised by their high-gloss surface. The result is achieved by a special surface polish that ensures that the nickel and chrome layers adhere particularly well. The collars receive double and therefore long-term protection against rust.

Surface damage caused by external influences can attack the steel core. Therefore, we cannot give any guarantee against corrosion for collars and other articles made of steel.

- DOUBLE RUST PROTECTION BY NICKEL AND CHROME LAYER
- HIGH-GLOSS SURFACE
- AFTER CLEANING WITH A MILD DETERGENT OR RINSING AGENT, DRY CAREFULLY

HARDWARE

SPRENGER offers a wide range of compatible fittings made of various materials and surfaces.
The fittings and assembly chains shown represent simply our standard program.

Due to our own construction department we are able to realize special metal fittings as well as pull-through chains and chain pieces on customer's request.
The minimum order quantity is 100 pieces, but can be higher depending on the article, material, surface and complexity.
After receiving your detailed inquiry, we will be pleased to verify the feasibility and provide you with an offer adapted to your needs.
